

# FEMALE ROLE MODELS IN BIOLOGY SEMINAR

## Eva K Fischer

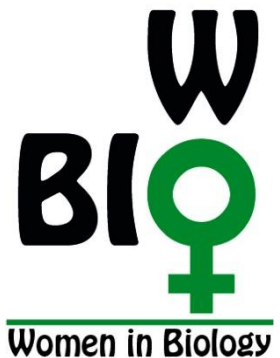

**Tuesday, 17.03.2020 10:00-11:00**  
**Seminarroom Cognitive Biology**

Eva K Fischer is an assistant professor at the University of Illinois. Her lab explores mechanisms mediating behavior to understand how nervous systems can be both strikingly flexible and remarkably robust, and how these phenomena simultaneously give rise to widespread similarities and prodigious diversity in animal behavior. Eva uses integrative approaches to address these questions across hierarchical levels of biological organization and timescales in both the field and the lab.

This seminar is open for all female pre- and post-docs.  
Number of participants limited.  
First come, first served!
